These collections are not a mixture of discarded varieties but contain many high priced varieties and some of our interesting seedlings plus some very good standard varieties.

No. 1: 100 large bulbs, 1" and up, price \$4.25 prepaid in U.S.A. No. 2: 100 medium bulbs, 2" to 1", price \$3.25 prepaid in U.S.A.

These two collections if labelled would cost at least 50% more. 50 bulbs may be ordered at same rate.

No. 3: 100 bulbs, large size, in newer, higher priced varieties, price \$9.00 prepaid in U.S.A.

No. 4: 100 bulbs, same as collection #3, but in medium size, price \$6.75.

These two collections are the best value you can get at these prices. 50 at same rate. Liberal allowance of extras.

We are going to offer a few Do's and Don'ts for your Glad Garden.

First: Open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable coller, or a place where it is not too warm or too cold. After your soil has been prepared in the Spring of the year, furrow out your rows and scatter in the bottom of the trench, a good Commercial fertilizer such as 4-12-4, 4-8-10, or 5-10-10 or any other good Commercial fertilizer that is available in your community. Mix well with the soil, setting large bulbs about five inches deep, and five inches apart, other size bulbs in proportion, with the smallest about two inches deep and two inches apart. All Glad bulbs must be dipped before planting in order to kill any thrips or disease that may be on them. We use Lysol. One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before planting. Any water container will do. Do not plant near buildings, heavy rooted plants such as trees, etc.. Cultivate frequently enough to keep soil loose and free from weeds, not too deep, and after every heavy rain or watering. Spraying and dusting for thrip (adults are small black insects about 1/16 of an inch long) we have used the two following formulas:

DDT Spray: 2 rounded teaspoonfuls DDT (50%) wettable; I teaspoonful Drcft; 2 gallons water, mix well and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. As effective as spraying but very much faster. We dust once in about every 10 days after foliage is 8 or 10 inches high. Do not use DDT dust on blooms as it will spot.

If you send us names of friends that grow Glads with your orders we will add extra bulbs as a reward.

These are State inspected bulbs. We try to and observe the fact that making friends is very essential to our business.

Sincerely yours,

HILLTOP FARMS, Morrison, Illinois
